

Apple iPhone Adobe not refreshing

If an Adobe page on your iPhone is not refreshing, it could be due to a few common issues: outdated Adobe app or iOS version, unstable internet connection, or problems with your Adobe account or browser caching issue. Troubleshooting steps include checking for updates, restarting your device, ensuring a stable internet connection, or clearing your caching and cookies

For Safari BROWSER:

1. **Open Settings:** Go to the Settings app on your iPhone.
2. **Open APPS at bottom or setting page.**
2. **Find Safari:** Scroll down and tap on "Safari".
3. **Clear History and Website Data:** Scroll down and tap on "Clear History and Website Data".
4. **Select "All History"**
4. **Confirm:** Tap "Clear History" again to confirm.

Closing all Apps manually:

1. Unlock iPhone
2. Pull up from the bottom of the iPhone and all OPEN apps will pop up.
3. Grab and slide each app up until it disappears.
